

INDEX

Volume 16, 1972

General Procedures Used in Compiling the Index

(1) Topic words and phrases have been selected as index terms, on the basis of what appears to be the current common usage in the literature itself. If the topic word is identical with, or very closely related to, the first word in the title of an article, the title has not been separately listed.

(2) Cross-references have been inserted sparingly; in most cases, multiple listings have been preferred to the use of syndetics.

(3) Personal names of all authors of articles, book reviews, and books reviewed have been included, along with a few names used as subjects. There has been no attempt to distinguish, typographically, the name used as author from the name used as subject.

(4) An "r" in parentheses following a page reference signifies that a book by that person, of that title, or on that topic has been *reviewed* on those pages.

(5) Corporate names have been indexed under the common form of the name as it normally appears in print (not in inverted form). Acronyms and initialisms are recorded as such, and they are filed as words, whether they are so pronounced or not.

(6) "ERIC/CLIS Abstracts" have been indexed under author and subject only, except for a few distinctive title entries.
